The performance shown represents past performance. Past performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment results and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. To obtain performance data current to the most recent month-end, access our website at www.hwcm.com.

You should consider the Funds' investment objectives, risks, and charges and expenses carefully before you invest. The Funds' prospectus, which can be obtained by calling (800) 796-5606, contains this and other information about the Funds. Read the prospectus carefully before you invest.

Returns shown for Class A, C and R shares for the periods prior to their inception are derived from the historical performance of Class I shares of the applicable Fund during such periods and have been adjusted to reflect the higher total annual operating expenses of each specific class. Performance for classes without sales charges would be lower if the sales charges were shown. Total returns with sales charges reflect the deduction of the current maximum initial sales charges of 5.25% for Class A shares (3.75% for the High Yield Fund Class A shares) and the applicable contingent deferred sales charge (CDSC) for Class C shares. Class C CDSC is 1% for the first year. Class I shares are sold to a limited group of investors. Periods over one year are average annual total return. Average annual total returns include reinvestment of dividends and capital gains. Expense limitations may have increased the Funds' total returns. Expense ratios shown are gross of any fee waivers or expense reimbursements.

Mutual Fund investing involves risk, loss of principal is possible.

N/A Partial period index returns are unavailable.

HOTCHKIS AND WILEY FUNDS

For the Mid-Cap Value, Small Cap Value and Value Opportunities Funds, investing in small and medium-sized companies involves greater risks than those associated with investing in large company stocks, such as business risk, significant stock price fluctuations and illiquidity. For the Value Opportunities Fund, investing in non-diversified funds involves greater risks than those associated with investing in diversified funds, such as business risk, significant stock price fluctuations, sector concentration and illiquidity.

For the High Yield Fund, investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. The Fund may invest in derivative securities, which derive their performance from the performance of an underlying asset, index, interest rate or currency exchange rate. Derivatives can be volatile and involve various types and degrees of risks. Depending on the characteristics of the particular derivative, it could become illiquid. Investment in Asset Backed and Mortgage Backed Securities include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments.

The S&P 500 Index, an unmanaged index, consists of 500 stocks chosen for market size, liquidity, and industry group representation. It is a market-value weighted index (stock price times number of shares outstanding), with each stock's weight in the Index proportionate to its market value. The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values.

The Russell Midcap Index, an unmanaged index, measures the performance of the 800 smallest companies in the Russell 1000 Index. The Russell Midcap Value Index measures the performance of those Russell Midcap companies with lower price-to-book value ratios and lower forecasted growth values.

The Russell 2000 Index, an unmanaged index, is comprised of the 2,000 smallest companies in the Russell 3000 Index. The Russell 2000 Value Index measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values.

The Russell 3000 Index, an unmanaged index, is comprised of the 3,000 largest U.S. companies based on total market capitalization, which represents approximately 98% of the investable U.S equity market. The Russell 3000 Value Index measures the performance of those Russell 3000 Index companies with lower price-to-book ratios and lower forecasted growth values.

The BofA Merrill Lynch U.S. High Yield BB-B (Constrained 2%) Index contains all securities in the BofA Merrill Lynch U.S. High Yield Index rated BB+ through B- by S&P (or equivalent as rated by Moody's or Fitch), but caps issuer exposure at 2%. Index constituents are capitalization weighted, based on their current amount outstanding, provided the total allocation to an individual issuer does not exceed 2%. The BofA Merrill Lynch Indices were known as The Merrill Lynch Indices prior to September 25, 2009.

The cited indexes do not reflect the payment of transaction costs, fees and expenses associated with an investment in the Funds. It is not possible to invest directly in these indexes. The Funds' value disciplines may prevent or limit investment in major securities in their benchmark indexes. The Funds' returns may not correlate with the returns of their benchmark indexes.
