

GLOBAL VALUE

MARKET COMMENTARY

The MSCI World Index increased by +6.4% in the third quarter of 2024. The MSCI World Value Index rose by +9.6%, while the MSCI World Growth Index increased by +3.5%. Ten of the eleven MSCI World GICS sectors delivered positive returns during the quarter. Utilities led with a return of +18.1%, followed by real estate (+17.2%), financials (+10.8%), and materials (+10.7%). In contrast, the energy sector experienced a decline of -2.2%, marking its second consecutive quarterly decline.

Macroeconomic factors significantly influenced market performance during the quarter. The easing of inflationary pressures paved the way for lower interest rates, benefiting rate-sensitive sectors such as utilities and real estate, particularly companies with high leverage. Our portfolio is underweight these sectors, which weighed on relative performance. Conversely, commodity-related stocks, which typically thrive in inflationary environments—such as energy—underperformed in Q3. Sentiment in oil and gas stocks reached a historic low, as a recent report indicated that hedge funds are the most bearish on these stocks since 2020. The portfolio is slightly overweight in energy, and we anticipate improved performance as the economic landscape evolves and sentiment improves.

The technology sector also underperformed during the quarter, as investors assessed relative valuations and weighed the potential for an economic slowdown. Our technology sector exposure looks very different from the mega-cap tech that dominates the broad market indices. We own businesses where expectations are low, and earnings power is misunderstood.

Looking ahead, lower interest rates are typically favorable for markets. However, it is critical to focus on long-term trends rather than short-term fluctuations. We remain committed to identifying businesses with durable balance sheets, sustainable returns on equity, stable free cash flow, and attractive valuations relative to expected earnings. Our decision to underweight high-leverage companies reflects

our focus on seeking better risk-adjusted returns elsewhere. We believe our investment strategy, centered on identifying undervalued assets and effective risk management, is poised to generate consistent long-term returns.

ATTRIBUTION ANALYSIS – 3Q24

The Hotchkis & Wiley Global Value portfolio underperformed the MSCI World Value Index in the third quarter of 2024 (gross and net of management fees). Stock selection and the overweight in energy detracted the most from relative performance. Stock selection in financials, communication services, consumer discretionary, and industrials also detracted. Conversely, stock selection in technology contributed positively during the quarter. Stock selection in materials also helped, as did the overweight in industrials.

LARGEST INDIVIDUAL CONTRIBUTORS – 3Q24

F5 (FFIV) sells application networking and security software, as well as data center appliances. The company's stock price rebounded sharply in Q3 after reporting a growing pipeline and better close rates in subscription software sales. F5 has no debt, trades at an attractive valuation, and is benefiting from an improving gross margin and lower operating expenses.

Ericsson (ERIC) is the largest vendor of hardware and software for operating wireless networks outside of China. Sentiment is improving on signs of revenue stabilization and margin improvement, including evidence of recovery in the important North American market.

Qantas (QAN AU), the larger of the two major Australian airlines, performed well on positive earnings news and a continued favorable outlook. Having repurchased 9% of the company's shares for the second consecutive year, Qantas announced an additional A\$0.4 billion buyback. The valuation for this well-positioned airline remains attractive.

(continued)

Net of fee composite performance as of 9/30/24: 27.34%, 12.44%, and 8.34% for 1-, 5-, and 10-year, respectively. Net performance results are presented after management fees and all trading expenses but before custodial fees.

The selection criteria used to determine the top contributors and detractors remains the same across performance measurement periods; additional disclosures provided in Endnotes. **Past performance is no guarantee of future results.**

GLOBAL VALUE

LARGEST INDIVIDUAL DETRACTORS – 3Q24

Samsung (005930 KS) is a diversified technology company with leading positions in semiconductors, display panels, mobile phones, consumer electronics, and appliances. Samsung's stock price declined in Q3 due to several factors, including weakening demand for consumer electronics, continued challenges in the semiconductor industry, and supply chain disruptions. As the largest company in the three-player DRAM oligopoly with 43% market share, we believe Samsung is well positioned as DRAM demand is expected to grow high-single-digits over time, driven by growth in AI, cloud computing, and internet connected devices.
