

### DESCRIPTION

The Large Cap Disciplined Value Fund focuses on undervalued large cap stocks. The Fund relies on in-depth fundamental research to develop a portfolio of 50-80 companies that are under-earning due to temporary factors but we believe have the balance sheet, scale, and market position to improve their performance over time.

### ABOUT US

Since 1980, Hotchkis & Wiley has focused on discovering undervalued securities through extensive internal research. We manage \$37 billion in value equity and high yield assets for institutional and mutual fund investors. The firm is independently owned with a majority interest held by employees.

The information herein is not approved by Russell. H&W and Russell sectors are based on the Global Industry Classification Standard by MSCI and S&P.

The Russell 1000® Value Index measures the performance of those Russell 1000® companies with lower price-to-book ratios and lower forecasted growth values. The index does not reflect the payment of transaction costs, fees and expenses associated with an investment in the Fund. It is not possible to invest directly in an index.

Data source: H&W, Russell, Bloomberg. Holdings are subject to change and are not buy/sell recommendations. Price/Normal Earnings is the current market price per share divided by normalized earnings per share. Forward Price/Earnings (FY2) is the projected P/E ratios of the companies invested in the portfolio, which ratios represent current market price per share divided by a company's estimated future earnings-per-share. Projected earnings are consensus analyst forecasts; actual P/E ratios may differ from projected P/E ratios. Price/Book is the price of a stock divided by its book value. Market Capitalization of a company is calculated by multiplying the number of outstanding shares by the current market price of a share. Turnover is an annualized rate found by dividing the lesser of purchases and sales by the average of portfolio assets. Active Share is the extent to which the portfolio differs from the designated Index. Diversification does not assure a profit nor protect against loss in a declining market.

Mutual fund investing involves risk. Principal loss is possible.
