***Mutual fund investing involves risk, loss of principal is possible.** For the Mid-Cap Value, Small Cap Value, Small Cap Diversified Value, Value Opportunities, and International Small Cap Diversified Value Funds, investing in small and medium-sized companies involves greater risks than those associated with investing in large company stocks. For the Value Opportunities Fund, investing in non-diversified funds means it may concentrate its assets in fewer individual holdings than a diversified fund. For the High Yield and Value Opportunities Funds, investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments by the Funds in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities. The High Yield and Value Opportunities Funds may invest in derivative securities, which can be volatile and involve various types/degrees of risk. Investments in foreign as well as emerging markets involve additional risk. Please read the funds' prospectus for a full list of fund risks.*
