Composite: The Composite includes all Value Opportunities discretionary accounts. The Value Opportunities strategy seeks capital appreciation primarily through investments in equity securities, such as common stock, preferred stock and convertible securities, of any size market capitalization, and investment grade and high yield (“junk bonds”) fixed income securities. Companies that is believed to have strong capital appreciation potential and may invest in foreign (non-U.S.) securities. It may enter into currency contracts (such as spot, forward and futures) to hedge foreign currency exposure. Index: The Russell 3000® Value Index (“R3000V”) includes stocks from the Russell 3000® Index with lower price-to-book ratios and lower expected growth rates. The index assumes reinvestment of dividends and capital gains, and assumes no management, custody, transaction or other expenses. The value disciplines used in managing the accounts in the Composite may prevent or limit investment in major stocks in the R3000V and returns may not be correlated to the index. Beginning December 15, 2023, the S&P 500® Index, previously included on the report as a supplemental index, will be removed. Benchmark returns are not covered by the report of independent verifiers.
